- Requirements
- Instructions
  - Setup Modem Connection Setup
  - Modem Connection 1200 BPS
  - Setup Modem Connection 300 BPS

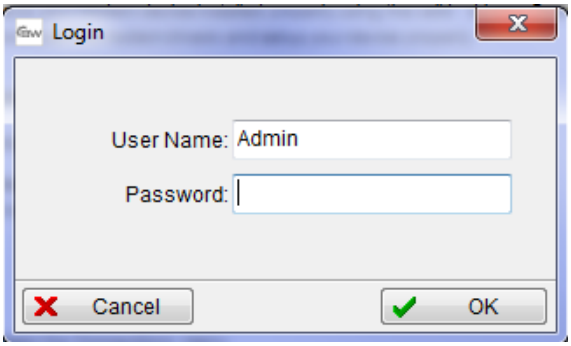

Requirements

- Have your modem device installed properly using the valid drivers. See the modem page to download the modem drivers and setup your device properly.

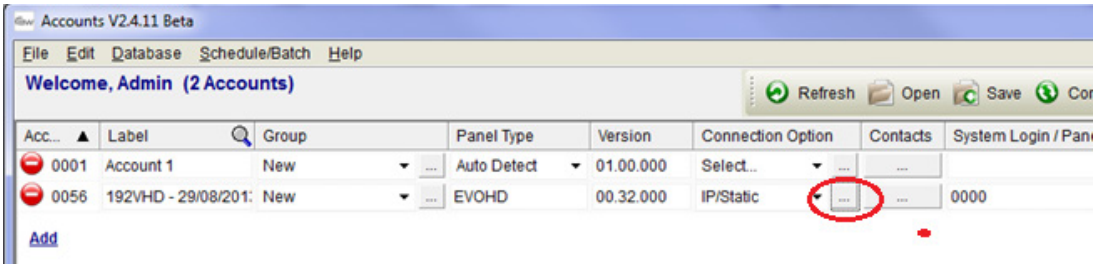

Instructions

Setup Modem Connection

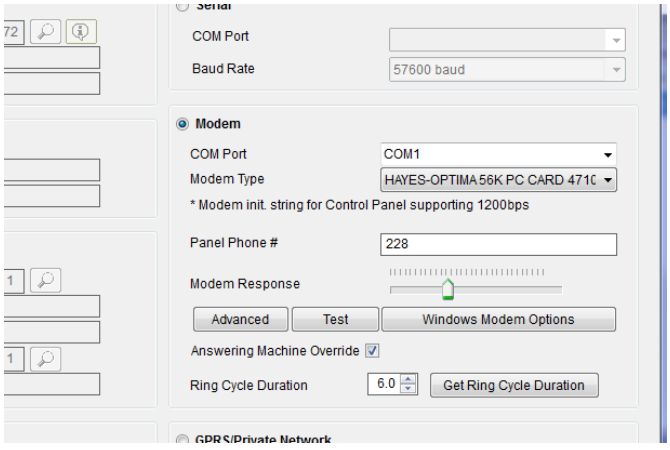

1. **Start** *BabyWare Software*
2. Enter user/password on the login screen. Default user credentials are:
    a. User = **admin**
    b. Password = **1234**

3. **Open** the *Connections* menu by pressing on the button with the 3 dots under the *Connection Option* column

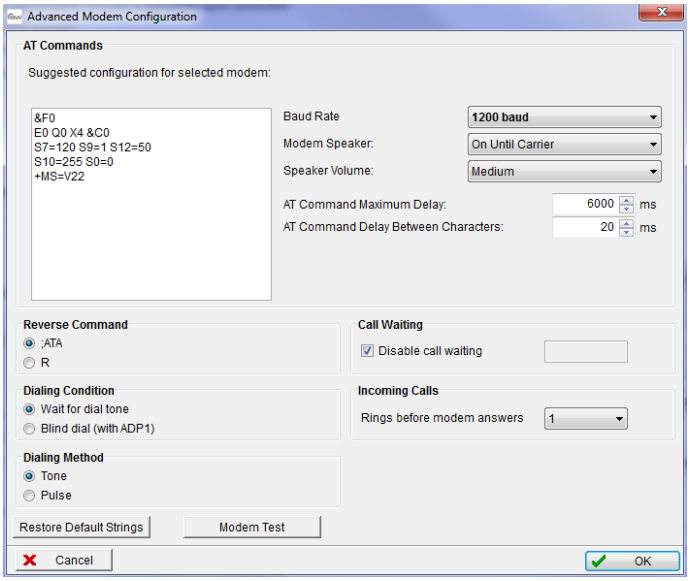

4. Under the Modem connection tab, **select** your modem *Com Port*

Setup Modem Connection 1200 BPS

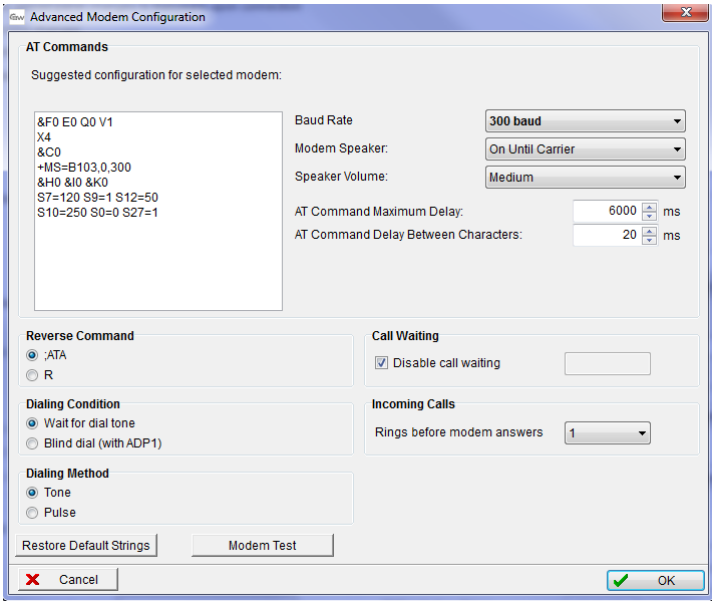

1. Under the Modem connection tab, **select** your modem type under the *Modem Type* drop-down menu. Look for the 1200 BPS options (indicated with the "*" sign)
2. Under the Modem connection tab, **click** on the *Advanced* button
3. In the advanced menu, under the AT commands tab, **type** the following *Init Strings*.

4. In the advanced menu, under the AT commands tab, **set** *Baud Rate* to 1200.

Setup Modem Connection 300 BPS

1. Under the Modem connection tab, **select** your modem type under the *Modem Type* drop-down menu.
2. Under the Modem connection tab, **click** on the *Advanced* button
3. In the advanced menu, under the AT commands tab, **select** the proper modem under the *Set modem as...* drop-down menu. **Avoid** the 1200 BPS options.
4. In the advanced menu, under the AT commands tab, **type** the following *Init Strings*.

5. In the advanced menu, under the AT commands tab, **set** *Baud Rate* to 300.
